

# ***ANNEX II + III: TECHNICAL SPECIFICATIONS + TECHNICAL OFFER***

**Contract title: Supply of vehicles**

**p 1 /...**

**Publication reference: CN2-SO2.4-SC049/TD1**

**Columns 1-2 should be completed by the contracting authority**

**Columns 3-4 should be completed by the tenderer**

**Column 5 is reserved for the evaluation committee**

Annex III - the contractor's technical offer

The tenderers are requested to complete the template on the next pages:

- Column 2 is completed by the contracting authority shows the required specifications (not to be modified by the tenderer),
- Column 3 is to be filled in by the tenderer and must detail what is offered (for example the words 'compliant' or 'yes' are not sufficient)
- Column 4 allows the tenderer to make comments on its proposed supply and to make eventual references to the documentation

The eventual documentation supplied should clearly indicate (highlight, mark) the models offered and the options included, if any, so that the evaluators can see the exact configuration. Offers that do not permit to identify precisely the models and the specifications may be rejected by the evaluation committee.

The offer must be clear enough to allow the evaluators to make an easy comparison between the requested specifications and the offered specifications.

## **GENERAL REQUIREMENTS**

- Any specification referring to a particular product or manufacturer, in particular to types, models and brand names, are to be understood as “or equivalent”. Where equivalency shall be subject to technical evaluation, the respective documentation giving evidence of equivalency, and - if appropriate - an assessment by an independent recognized party shall be provided with the offer.
- The Tenderer’s offer must be accompanied by manufacture’s catalogue, technical brochures, technical data sheets etc. showing in details type, dimensions, size and description of the offered vehicles and/or technical documentation proving the required performance and parameters in order to verify the compliance with the technical specifications.
- The vehicles must be brand new and delivered DDP at the premises of the Contracting Authority.
- Visibility requirements: All items must be marked in accordance with the Communication and Visibility Requirements for EU-financed external actions published by the European Commission (Communication and Visibility Requirements for EU External Actions | International Partnerships (europa.eu)). Correct size and design of sticker and wording will be provided to the Contractor by the Contracting Authority. Production and placement of stickers must be calculated in the price of the vehicles.
