

## **TECHNICAL DESCRIPTION**

of an adrenaline park for children, in N.P. Pelister

### **1. GENERAL INFORMATION**

#### **1.1 Introduction**

The preparation of the Project for the construction of an adrenaline park for children, in N.P. Pelister, K.O. Magarevo, KP. no. 245/1, 245/110, Municipality of Bitola, is in accordance with the requirements and needs of the investor, after consultations and meetings of the planners and the investor. The project documentation is prepared in accordance with the applicable legislation, standards and regulations for the construction of this type of facilities.

#### **1.2 Location**

The adrenaline park for children is located at KP. no. 245/1, 245/110 in K.O. Magarevo, Municipality of Bitola. The location is easily accessible, as it is located in close proximity to "Lazo Villa" in N.P. Pelister. The adrenaline park will be installed on the surrounding trees with all the necessary props according to the manufacturer's specifications.

### **2. DESCRIPTION OF THE NEWLY PLANNED PARK**

#### **2.1 Function**

The adrenaline park will be used exclusively for children's recreation, all necessary props will be installed according to the manufacturer's specification. The park will be composed of 9 starting points and two houses that will be placed at a height of 1m from the surface of the earth, normally protection will be installed according to the manufacturer's recommendations and specifications. All the different contents are related to each other and are described in more detail together with the navigation directions in graphic attachment No. 4.

#### **2.2 Construction**

In addition to the function, the shape of the gauge is inevitably reflected in the design of the park's structural elements. All the elements will be mounted on the existing trees, according to the recommendations and specification from the manufacturer, with a note not to damage the existing living trees (non-invasive methods, such as screwing with screws or setting with nails), that is, the elements will be supported by tying, and the fastening will be performed with clamps around the stem. The only thing is that the construction system will be used for both houses, which will be completely wooden, that is, the houses will be built entirely from wooden beams and boards, with built-in safety regulations, according to the manufacturer's recommendations and specifications. All other

elements that will appear and that should be an integral part of the adrenaline park for children will be placed and mounted according to the manufacturer's specification.

### 2.3 Shaping

In the domain of aesthetic appearance, the construction of the adrenaline park, i.e. the installation of a new form and function in the space will certainly have a positive impact on the visual impression.

The performance of the works and the installation of the construction materials should be carried out in accordance with the applicable norms and standards in the field of construction, by an authorized, licensed company.
