

TECHNICAL DESCRIPTION

of an adrenaline park for adults, in N.P. Pelister Park

1. GENERAL INFORMATION

1.1 Introduction

The preparation of the Project for the construction of an adrenaline park for adults, in N.P. Pelister, K.O. Magarevo, KP. no. 245/1, 245/110, 348, 351/6, 537/1, Municipality of Bitola, is in accordance with the requirements and needs of the investor, after consultations and meetings of the designers and the developer. The project documentation is prepared in accordance with the applicable legislation, standards and regulations for the construction of this type of facilities.

1.2 Location

The adrenaline park for adults is located at KP. no. 245/1, 245/110, 348, 351/6, 537/1, in K.O. Magarevo, Municipality of Bitola. The location is easily accessible, as it is located in close proximity to "the Lazo Villa" in N.P. Pelister. The adrenaline park will be installed on the surrounding trees with all the necessary props according to the manufacturer's specifications.

2. DESCRIPTION OF THE NEWLY PLANNED PARK

2.1 Function

The adrenaline park will be used exclusively for adult recreation, all necessary props will be installed according to the manufacturer's specification. The park will consist of 18 starting points and one platform, which will be used as a starting point. The starting point, that is, the platform (object "A") will be 4m high, the top of the platform will be accessed by stairs (16 stairs with a height of 25cm). It will be attached to the existing building - "the Lazo Villa" on its northern facade. The space under the platform will be used as a room intended for storing the necessary protective equipment needed to use the adrenaline park for adults. All elements in the adrenaline park for adults will be placed at a height of 5-5.5m from the surface of the ground, protection and equipment with double security will normally be placed, according to the manufacturer's recommendations and specification. All the different contents are related to each other and are described in more detail together with the navigation directions in graphic attachment No. 3.

2.2 Construction

In addition to the function, the shape of the gauge is inevitably reflected in the design of the structural elements of the park. The structural system is completely wooden, it is built from wooden beams and planks, and other elements are placed and mounted according to the

manufacturer's specification. All the elements will be mounted on the existing trees, according to the recommendations and specification from the manufacturer, with a note not to damage the existing living trees (non-invasive methods, such as screwing with screws or setting with nails), that is, the elements will be supported by tying, and the fastening will be performed with clamps around the stem. All other elements that appear and are to be an integral part of the adrenaline park for adults will be placed and mounted according to the manufacturer's specification.

2.3 Shaping

In the domain of aesthetic appearance, the construction of the adrenaline park for adults, i.e. the installation of a new form and function in the space will certainly have a positive impact on the visual impression.

The performance of the works and the installation of the construction materials should be carried out in accordance with the applicable norms and standards in the field of construction, by an authorized, licensed company.
